PERFORMANCE REVIEW & OUTLOOK

The year was marked by high volatility in the stock market. The BSE Sensitive Index which was 17,430 at the start of the financial year 2012-13 made a recovery to reach at 20,203 in January 2013 and finally declined at the year end to close at 18,835 on 31st March, 2013. While the year started on a poor note, there were frequent bouts of recovery & volatility and an upward trend was seen from June 2012 till January 2013. Even though the health of the domestic industry remained fragile during the year, an inflow of USD 22 billion into the Indian Equities by overseas investors supported the market. However, volatile prices of index stocks have caused a fear in the domestic investors and they were by and large sellers in every rally.

Amidst global slowdown and uncertainty, the economic activity in India remained subdued on account of halted investment demand, declining exports and weakening business and consumer confidence. The loss of growth momentum continued throughout the year 2012-13. The Gross Domestic Product (GDP) during 2012-13 slowed down from 5.5% in the first quarter to 4.8% in fourth quarter. The inflation measured by the Wholesale Price Index which remained sticky at above 7.5% through first half of 2012-13, fell to 5.9% in March, 2013. The softening of global commodity prices and lowering of prices moderated non-food inflation. However, the food inflation moved into double digit.

Due to high volatile stock market conditions, the Divestment/ Investment activity of the company was curtailed during the year and the Company posted Net Loss of Rs. 1586.36 Lakhs as compared to Rs 7.54 Lakhs in previous year.

Industry Trends and its future prospects have been summed up in the Management Discussion and Analysis Report which forms part of this report.

MANAGEMENT'S DISCUSSION AND ANALYSIS

1. Operating Results

The company earned a gross income of Rs. 29.62 Lakhs during the year under review compared to Rs. 44.68 Lakhs in the previous year. Gross and the net loss earned by the Company during the current year were Rs. 1585.38 Lakhs and Rs. 1586.36 Lakhs respectively (Gross and Net Loss of Rs. 6.60 Lakhs & Rs. 754 Lakhs respectively during the previous year)

2. Industry Trends and Business Analysis

The year was marked by high volatility in the stock market and most asset class remained subdued. Crude oil prices remained in the range of 80 to 105 US Dollar and commodity prices remained high. Inflation remained high even though the economy has slowed down with expected growth of 5.4% per annum. High interest rates by the Reserve Bank to curtail inflation have affected Industrial Growth. All these developments have been viewed negatively.

3. Opportunities and Threats

With the globalization and electronic age, Indian Stock Market changed over the past decade. Nearly 100% of all transactions are executed through electronic media online trading system. The developments of high-tech and transparent markets with an increasingly wide geographic footprint have increased the number of trading venues offering diverse pools of liquidity. Current elevated rates of inflation pose significant risks to future growth. With the attention of Government focussed in containing the inflation, the economic growth may see a deceleration with corporates turning in moderate growth.

4. Future Prospects and Outlook

Recent years have seen a lot of change and turmoil in Indian Industry. The problems of the global economy after its meltdown in previous 2-3 years have also not gone away. China's economy which was a strong growth engine has been slowing down especially in the housing and infrastructure sectors. The problems of Eurozone are making the nascent global recovery look weak. Asia and Japan continues to see growth though its composition varies across the region depending upon exposure to the export sector in different countries. Indian economy is likely to see reasonable growth of 5-6% in the near term though inflation, oil prices, budget deficits, interest rates, commodity prices and infrastructural bottleneck remain areas of concern.

5. Risks and concerns

The Company like any other Company is exposed to specific risks that are particular to its business and the environment within which it operates. The Company is exposed to the market risk (including liquidity risk) and also the factors that are associated with capital market, which inter alia includes economic/business cycle, fluctuations in the stock prices in the market, besides the interest rate volatility, and credit risk.

SIGNIFICANT ACCOUNTING POLICIES AND NOTES TO ACCOUNTS FOR THE YEAR ENDED 31ST MARCH, 2013

1. SIGNIFICANT ACCOUNTING POLICIES

1.1 BASIS OF PREPRATION OF FINANCIAL STATEMENTS: -

The Financial Statements are prepared under the Historical Cost Convention method in accordance with the generally accepted Accounting Principles and the Accounting Standards referred to in Section 211(3C) of the Companies Act, 1956.

1.2 USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent liabilities on the date of financial statements and reported amounts of revenue and expenses for that year. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

1.3 REVENUE RECOGNITION

1.3.1 All Income & Expenditure are accounted for on accrual basis.

1.3.2 Provision for loss in respect of open equity derivative instruments as at the balance sheet date is made indexwise/scrip wise. As a matter of prudence, any anticipated profit is ignored.

1.4 FIXED ASSETS

Fixed Assets are stated at cost less depreciation.

1.5 DEPRECIATION

Depreciation is provided on Fixed Assets on Straight Line method at the rates and in the manner specified in Schedule XIV to the Companies Act, 1956.

1.6 STOCK IN TRADE

Stock in trade is valued scrip-wise at cost or fair market value/ralizable value whichever is lower.

1.7 INVESTMENTS

Non current/Long Term Investments are valued at cost. Provision for diminution in the value of Long term/Non current investments is made only if such a decline is other than temporary.

1.8 EMPLOYEE BENEFITS

1.8.1 Employee Benefits are recognized/accounted for on the basis of revised AS-15 detailed as under :-

- 1.8.2 Short Term Employee benefits are recognized as expense at the undiscounted amount in the Profit & Loss account of the year in which they are incurred.
- 1.8.3 Employee benefits under defined contribution plans comprise of contribution to Provident Fund and Superannuation. Contributions to Provident Fund are deposited with appropriate authorities and charged to Profit & Loss account. Contribution to Superannuation are funded with Life Insurance Corporation of India.
- 1.8.4 Employee Benefits under defined benefit plans comprise of gratuity and leave encashment which are accounted for as at the year end based on actuarial valuation by following the Projected Unit Credit (PUC) method. Liability for gratuity is funded with Life Insurance Corporation of India.
- 1.8.5 Termination benefits are recognized as an Expense as and when incurred.
- 1.8.6 The actuarial gains and losses arising during the year are recognized in the Profit & Loss account of the year without resorting to any amortization.

1.9 TAXATION

Tax expenses for the year comprises of Current tax and deferred tax charge or credit. The deferred Tax Asset and deferred Tax Liability is calculated by applying tax rates and tax laws that have been enacted or substantially enacted by the Balance Sheet date. Deferred Tax assets arising mainly on account of brought forward losses and unabsorbed depreciation under tax law are recognised only if there is virtual certainty of its realisation. Other deferred tax assets are recognised only to the extent there is a reasonable certainty of realisation in future. Deferred Tax Assets/Liabilities are reviewed at each balance sheet date based on development during the year, further future expectations and available case laws to reassess realisation/ liabilities.

1.10 IMPAIRMENT OF FIXED ASSETS

Consideration is given at each balance sheet date to determine whether there is any indication of impairment of the carrying amount of the Company's Fixed Assets. If any indication exists, an asset's recoverable amount is estimated. An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value based on an appropriate discount factor.

Reversal of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses recognized for the asset no longer exist or have decreased. However, the increase in carrying amount of an asset due to reversal of an impairment loss is recognized to the extent it does not exceed the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognized for the assets in prior years.

1.11 CONTINGENCIES:

The company creates a provision when there is present obligation as result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, requires an outflow of resources.
